

Dear Sir or Madam

I would like to express my concern over HR 4026. I understand it may curb satellite radio broadcasts. As a subscriber to satellite radio for over a year now I can tell you how satisfying it is to hear commercial free radio broadcast. I am a full time working man and enjoy a few hours on Sat or Sun listening to my favorite radio stations without being blasted by somebody screaming at me telling me I should buy their car or whatever.

It disturbs me greatly that certain organizations run to the government to do what they cannot do on the free market.

Please drop your support of this bill.

Thank you for your consideration.
